Delphi Packard Electric is a global supplier of automotive components and systems. The company has been in business for more than 100 years, and it has operations in 26 countries. Delphi Packard Electric is a major employer in the United States, with more than 20,000 employees.

In recent years, Delphi Packard Electric has been investing heavily in new technologies and worker training. The company has spent more than \$1 billion on new equipment and technology, and it has also invested in training programs for its employees.

Delphi Packard Electric's investment in new technology and worker training has paid off. The company has increased its productivity and profitability, and it has also won new business. In 2016, Delphi Packard Electric had sales of \$16 billion, and the company is expecting to grow its sales by 5% in 2017.

Delphi Packard Electric's success is a model for other companies that are looking to revive American manufacturing. The company has shown that it is possible to compete with foreign manufacturers by investing in new technology and worker training.

Here are some of the lessons that other companies can learn from Delphi Packard Electric's success:

- **Invest in new technology.** New technology can help companies to increase their productivity and profitability. Delphi Packard Electric has invested heavily in new equipment and technology, and it has seen a significant return on its investment.
- **Train your employees.** Well-trained employees are more productive and efficient. Delphi Packard Electric has invested in training programs for its employees, and it has seen a positive impact on its bottom line.
- **Focus on innovation.** Innovation is essential for companies that want to stay ahead of the competition. Delphi Packard Electric has a strong commitment to innovation, and it has developed a number of new products and technologies.
- **Be patient.** It takes time to revive American manufacturing. Delphi Packard Electric has been investing in new technology and worker

training for many years, and it is only now starting to see the benefits of its investment.

Reviving American manufacturing will not be easy, but it is possible. By following the example of Delphi Packard Electric, companies can help to bring back jobs and boost the economy.
